

VIGNESHRAAJ

Senior Software Developer | Full-Stack Developer | Next.js | React | TypeScript | Node.js | MongoDB

Chennai, Tamil Nadu, India | vigneshraaj19@gmail.com | +91 8248218821 | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Software Developer with 4+ years of experience designing and building production-grade web applications and SaaS products using Next.js, React, TypeScript, Node.js and MongoDB. Skilled in taking features from requirement analysis through architecture, development, integration, debugging and production deployment. Hands-on experience owning project structure, core business logic, REST API development and PayPal payment integration for applications used by real users. Comfortable making technical decisions across the stack and writing maintainable, scalable code in fast-moving product and startup environments.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: Next.js, React.js, HTML5, CSS3

Backend: Node.js, Next.js API Routes, REST APIs, API Integration

Database: MongoDB, Mongoose, MySQL(basic)

Cloud / DevOps: Docker, GitHub Actions, CI/CD, AWS, Terraform, Vercel

Tools: Git, GitHub, Chrome DevTools, Jira, Bitbucket, Lighthouse

Integrations: PayPal, CCAvenue, Payment APIs

AWARDS & RECOGNITION

Best Performer Award

Recognized with the Best Performer Award for outstanding performance, contribution to projects, and consistent delivery of high-quality work. This recognition reflects a commitment to problem-solving, teamwork, ownership, and delivering impactful solutions.

PROFESSIONAL EXPERIENCE

Senior Software Developer | Prodex Technologies

Jul 2025 – Present | Chennai, India

- Built a production-level SaaS application from the ground up, starting with initial project setup, framework selection, and folder/architecture design.
- Collaborated in technical and business-logic decision-making, contributing to architecture choices and feature scoping.
- Made key technical decisions on frameworks, libraries and application configuration, establishing a scalable and maintainable project structure.
- Worked across the full stack using Next.js, React.js to deliver end-to-end application features.
- Designed and implemented core business logic, translating product requirements into functional, production-ready code.
- Built reusable UI components and application functionality using React.js to accelerate development and ensure consistency.
- Developed and integrated REST APIs to connect frontend functionality with backend services and third-party systems.
- Implemented PayPal payment integration, handling transaction flow and business logic for payment processing.
- Owned features end-to-end — from requirement understanding through development, debugging, and production deployment — for an application now live and in use by users.
- Focused on code quality, maintainability and production readiness using Git/GitHub for version control and CI/CD practices, with exposure to Docker, AWS and Terraform for deployment and infrastructure.

Full-Stack Developer | Vvt Solutions

Jul 2023 – May 2025 | Chennai, India

- Worked as an individual contributor maintaining both the frontend and backend of TopAll NextJS Application, a live consumer-facing application.
- Solved complex, hard-to-reproduce bugs and implemented new features to improve application stability and functionality.
- Implemented payment integration using CCAvenue, handling transaction flow and related business logic.
- Built and maintained payment modules, user authentication, and other core application features using Node.js.

- Collaborated closely with backend developers, the scrum master and the UX designer within an agile development process.
- Built and deployed frontend changes to Vercel, and resolved bugs reported by the QA team in a timely manner.
- Worked across the software development lifecycle — planning, coding, implementation, integration, testing and support.
- Received the Best Performer Award for outstanding performance, consistent delivery of high-quality work, and strong ownership across projects.

Full-Stack Developer | Pearlcon Technologies

Nov 2022 – Apr 2023 | Chennai, India

- Developed features across the MERN stack (MongoDB, Express/Node.js, React.js) for B2C web applications.
- Implemented business functionality and core application logic in collaboration with the development team.
- Built and integrated REST APIs to support application features and data flow between frontend and backend.
- Contributed to an e-commerce application, developing customer-facing functionality and supporting business workflows.
- Debugged and resolved issues across the stack to support stable, production-oriented releases.

Software Developer | I-Script Technologies

Sep 2021 – Nov 2022 | Chennai, India

- Developed responsive, reusable UI components using React.js, JavaScript, HTML and CSS for business and e-commerce applications.
- Styled and structured interfaces using CSS to deliver consistent, responsive user experiences across devices.
- Integrated frontend components with backend APIs to display and manage application data.
- Debugged UI and functional issues using Chrome DevTools, improving reliability of real-world application features.
- Collaborated with the team to translate business requirements into working frontend features.

SELECTED PROJECTS

ProspectGrabber — B2B Sales Intelligence Platform

- Contributed to ProspectGrabber, a cloud-based B2B lead generation and sales intelligence platform that runs live internet research in real time — instead of relying on static pre-built databases — to surface verified email addresses, direct company phone numbers, and LinkedIn profiles.
- Worked on frontend and backend features supporting the platform's search and data-retrieval functionality.

TopAll — B2C Application

- Contributed to TopAll, an online test-series and exam-preparation platform for NEET and JEE aspirants, offering practice tests, a large question bank, and performance analysis for students across India.
- Developed frontend features and supported business functionality using React.js and related web technologies.
- Integrated APIs to handle application data and user-facing functionality.

LMS — Learning Management System

- Developed features for a Learning Management System built for Nibav Lifts, used to train sales personnel through structured courses tied to internal promotion levels.
- Built reusable components and handled API integration for course content, progress tracking, and promotion-related application data.

EDUCATION

Master of Computer Applications (MCA) — Vellore Institute of Technology (2019 – 2021)

Bachelor of Computer Applications (BCA) — Jaya College of Arts and Science (2016 – 2019)

Full Stack Developer Course — GUVI / IIT Madras (Nov 2021 – Oct 2022)
